

Guidance for estimating number of lesions –

proxy for disease severity

- ▶ <50 Can count # easily within 30 seconds
- ▶ $50 - <250$ Patient's hand can be placed on affected area without covering 1 or more lesions
- ▶ $250 - <500$ Patient's hand cannot be placed on affected area without covering 1 or more lesions
- ▶ ≥ 500 Cannot visualize normal skin

Mild: < 50 lesions,
(can easily count)

Moderate: 50-249 lesions,
(can place hand on body
without covering any lesions)

Moderately severe:
250-499 lesions (hand
placed on body will
cover one or more lesions)

Severe: 500+ lesions
(difficult to see normal skin)
